DEFINITIONS AND EXPLANATIONS

FARM LAND -- Total land in farms is the sum of the acreage of all tracts reporting crops harvested or livestock produced during the previous year. This also includes the acreage in farm tracts which were idle during the year.

IMPROVED PASTURE -- The definition of improved pasture as used here is "Any pasture which has been seeded with recommended pasture grass mixtures such as Ladino or grass mixtures, fertilized or otherwise improved". This figure excludes new pasture seeded in the fall of 1954.

ALL OTHER OPEN PASTURE -- Includes all open pasture not reported as improved, but excludes woodland and swampland used for pasture.

CROPS -- Reports for all crops except peanuts are for acreage harvested during 1954. The acreage of peanuts is acreage grown alone for all purposes and includes "acreage hogged", etc.

COMMERCIAL FERTILIZER -- The commercial fertilizer question was asked to include all applications of commercial fertilizer used on all crops and pasture during the entire year of 1954. Lime and land plaster are not included.

SOWS AND GILTS -- This question was asked "How many sows and gilts are being kept on the farm for breeding purposes"? In earlier years the question related to numbers of sows and gilts for Spring farrowing.

PEOPLE -- Includes only people living on tracts (3 acres or more) that had some form of agricultural activity in 1954.
